研究论文

循环流化床锅炉炉内原位催化脱硝技术研究及应用

Clean Coal Technology

Vol.31 No.4 (Series No.176) Apr. 2025

CONTENTS

Clean Coal Technology's 30th Anniversary

Advances in the application of finite element numerical simulations to electrocatalytic reduction systems of energy-related small molecules
Potential and research progress of CO_2 geological storage based on deep coal underground gasification
Column for Carbon Neutrality
Solid oxide electrolysis cell co-electrolysis technology for syngas preparation: structure, performance, and degradation mechanisms
Special Topic on Key Technologies for Carbon Capture in Typical Industrial Processes
Research and application progress on combustion-based carbon capture technologies in cement industry
WANG Junjie, YANG Huawei, ZHU Zhiping, CAI Jun (37)
Optimization and economic analysis of whole process design of a 5 000 TPD oxy-fuel combustion cement kiln
GAO Siyuan, DUAN Yuanqiang, DUAN Lunbo, MA Lei, YANG Hongcai, YANG Yu (52)
Research progress of carbon capture technology for O ₂ /CO ₂ combustion of coal-based fuels based on fluidization
activation
XU Guiling, QI Xiaobin, CAO Xiaoyang, YAN Yunfei (62)
Experimental study on NO_x formation characteristics of coal and ammonia co-firing in deep air staging mode
CUI Liming, LI Xiongwei, ZHANG Yixiang, ZHANG Su,
CHU Wei, LI Ming, TAN Houzhang, WANG Xuebin (78)
Numerical simulation on NO_x mechanism in flameless oxy-fuel combustion of semi-coke and biomass blends
WU Jiajia, LI Pengfei, ZHANG Fuqiang, CHENG Pengfei,
PENG Xueping, ZHAO Liang, DAI Zhongyuan, LIU Zhaohui ⁽⁸⁵⁾
Progress and prospect of CO ₂ low temperature catalytic desorption
(97) CHU Haozhan, ZHANG Hongyu, LI Bowen, ZENG Shaojuan, ZHANG Xiangping (97)
Chemical absorption method for CO ₂ capture: Research progress, performance comparison and prospects
Research progress on the influence of metal element doping on the structure and anti-sintering performance of
medium and high temperature CO ₂ adsorbents LI Lulu, XU Yufeng, JING Jieying, LI Wenying (140)
An experimental study of particle matters and NO _x controlling during ammonia/coal co-combustion
ZHANG Yong, CUI Baochong, RUAN Renhui, LI Ming, JIANG Heqing, WANG Xuebin, TAN Houzhang (154)
Research progresses on oxy-fuel combustion carbon dioxide capture technologies in cement industry
ZHOU Yuegui, WANG Yuting, HUANG Guanshuo, CHEN Tao (163)
New polygeneration system for CCUS in coal-fired power plants
ZHANG Jiahao, HAN Chaohan, WU Ying, YUAN Yuyang,
DUAN Yuanqiang, MA Jiliang, CHEN Xiaoping (181)
Research Articles
Development and application of in-situ catalytic denitrification technology for circulating fluidized bed boilers
